

**Practical  
&  
Efficient  
Cattle!**

Home of the herd with the most ***Dams of Distinction!***

We have been **Performance Testing** for over 44 years focusing on:

Calving Ease

Milking Ability

Fertility

Easy Fleshing

Thickness

Muscle

Soundness

Longevity

If you would like these traits in your herd then buy bulls from the herd that has the ***greatest number of Dams of Distinction*** both in 2003 and 2004!

We select for both ***light birth weight*** and ***performance***, along with good ***milking ability!***

We guarantee each animal we sell.

AGA 121G Stanmore 20J, June 2004

If you want to produce a quality product - it is advisable to start with one! Consider using **LBH Genetics!**

# Lilybrook Herefords Inc.

The Ranch is located 10 miles (16 km) East from Claresholm, Alberta, Canada on highway 520, then 4.5 miles (7.5 km) North.

We sell Purebred Horned Herefords. We offer yearling bulls and two year old bulls.

There are sometimes a small group of Cows and Calves for sale.

We breed and sell a group of about 100 – 200 commercial heifers.

Our bulls have won the test were it really counts, on the Range and in the Feedlots!

Gem General 13G

## Steer Trials

Some of the highlights of what we learned testing steers at the Alberta Hereford Steer Trial and the Hereford C to C program were the following:

1. At the 2000 steer trial one of our bull customer's steers topped the list on highest net \$ returned.
2. One of our own steers had the biggest ribeye area of all the steers on test.
3. In the C to C test, the sire group from Gem General 13G had, by far, the highest percent of Triple A (AAA) carcasses of the five sires tested.

**Lilybrook Herefords  
make \$ and a lot of \$ents!**
